Median Detects				0.49	CV Detects				0.207		
Skewness Detects				-0.123	Kurtosis Detects				0.196		
Mean of Logged Detects				-0.703	SD of Logged Detects				0.215		
Note: Sample size is small (e.g., <10), if data are collected using incremental sampling methodology (ISM) approach, refer also to ITRC Tech Reg Guide on ISM (ITRC 2020 and ITRC 2012) for additional guidance, but note that ITRC may recommend the t-UCL or the Chebyshev UCL for small sample sizes (n < 7). The Chebyshev UCL often results in gross overestimates of the mean. Refer to the ProUCL 5.2 Technical Guide for a discussion of the Chebyshev UCL.											
Normal GOF Test on Detects Only											
Shapiro Wilk Test Statistic				0.988	Shapiro Wilk GOF Test						
1% Shapiro Wilk Critical Value				0.686	Detected Data appear Normal at 1% Significance Level						
Lilliefors Test Statistic				0.173	Lilliefors GOF Test						
1% Lilliefors Critical Value				0.396	Detected Data appear Normal at 1% Significance Level						
Detected Data appear Normal at 1% Significance Level											
Note GOF tests may be unreliable for small sample sizes											
Kaplan-Meier (KM) Statistics using Normal Critical Values and other Nonparametric UCLs

Gamma ROS Statistics using Imputed Non-Detects									
GROS may not be used when data set has > 50% NDs with many tied observations at multiple DLs									
GROS may not be used when kstar of detects is small such as <1.0, especially when the sample size is small (e.g., <15-20)									
For such situations, GROS method may yield incorrect values of UCLs and BTVs									
This is especially true when the sample size is small.									
For gamma distributed detected data, BTVs and UCLs may be computed using gamma distribution on KM estimates

DL/2 is not a recommended method, provided for comparisons and historical reasons											
Nonparametric Distribution Free UCL Statistics											
Detected Data appear Normal Distributed at 1% Significance Level											
Suggested UCL to Use											
95% KM (t) UCL				0.581							
Note: Suggestions regarding the selection of a 95% UCL are provided to help the user to select the most appropriate 95% UCL.											
Recommendations are based upon data size, data distribution, and skewness using results from simulation studies.											
However, simulations results will not cover all Real World data sets; for additional insight the user may want to consult a statistician.
