Chris,

Attached, please find EPA's response to the fYNOP Groundwater Human Health Risk Assessment of November 2016.

Thanks to the team for everyone's patience during EPA's extended review,
Griff

Thanks, Chris. Update on the GW HHRA update: Betty Ann needed more time and now plans to complete review by the end of this week, so EPA's response will likely come next week.

Griff, thanks for the update on the review status for the GW HHRA. The fYNOP team is evaluating options for the SPBA, and a plan has been drafted that is going through internal review. We will be in touch to discuss the plan in the next few weeks.

Chris

Subject: Update on SPBA and HHRA EPA review

Hi Chris,

EPA wanted to reach out to see where things are for the proposed GW extraction/treatment at the SPBA, and I also wanted to let you know that I'll be in touch with Betty Ann this week (both of us were out last week) and hope to have EPA's formal response to the GW HHRA by next week.

Thanks for any update you may be able to provide,
Griff
